EDUCATION

BSC (HONS) IN INFORMATION TECHNOLOGY SPECIALIZING IN INFORMATION TECHNOLOGY

Sri Lanka Institute of Information Technology (SLIIT)

2021 - Present

PASSED G.C.E ADVANCE LEVEL

Mayurapada Central Collage

2019

PASSED G.C.E ODINARY LEVEL

Mayurapada Central Collage

2016

PROFILE

I'm a final-year IT undergraduate at SLIIT with hands-on experience from my internship at the Ministry of Plantation, where I worked on network server management, telecom systems, and WordPress development, and my role as Junior Web Developer at Visionary Design Vanguard, focusing on WordPress development, mobile responsiveness, and SEO optimization.

These experiences have strengthened my technical skills in troubleshooting, system optimization, and web development while developing my problem-solving abilities and collaborative approach. I'm passionate about building efficient digital solutions and eager to grow in software development, IT support, or full-stack environments.

WORK EXPERIENCE

Visionary design vanguard (Pvt) Ltd

2024 December - 2025 May

Junior Web Developer

- Developed and maintained websites using WordPress and Divi Theme Builder
- Focused on mobile responsiveness and content updates
- Gained hands-on experience in front-end development and layout optimization
- Collaborated with design teams to ensure brand consistency across pages
- Gained practical experience in SEO optimization, including improving site structure, meta tags, and load speed

MINISTRY OF PLANTATION

2024 may - 2024 November

IT and Web Development Intern

- Gained experience in WordPress web development, including design, customization, and maintenance.
- Developed a strong understanding of network servers, telecom lines, and web hosting.
- Acquired troubleshooting skills for network issues and PC hardware/software problems.
- Assisted in optimizing website performance, implementing security measures, and providing user support.
- Collaborated with teams to improve IT solutions and system efficiency.

PERSONAL PROJECTS

LeoAccess Website

Developed "LeoAccess", a professional website for a cleaning and technical services company based in Dubai, built using WordPress and Elementor. The site features a clean, responsive layout, service-focused design, and SEO optimization tailored for local visibility.

Technologies: WordPress, Elementor, SEO plugins, responsive design principles
